POOL MOSAIC TILE and BORDER

The Film Mount Pool Glass Tile

Film Mounted Pool Tiles are produced from cast 4mm full coloured glass. The Flicker surface finish is achieved by a chemical process which changes the surface structure to allow different light deflection. Cutting by Score and Brake or by pincer. White non-rigid adhesive is recommended.

For specific installation grout or adhesive, we recommend you to contact your local preferred adhesive manufacturer.

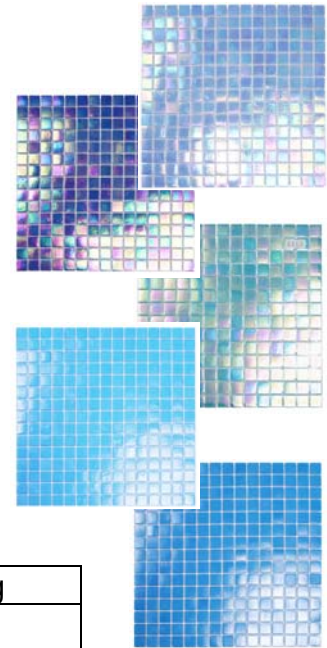

The face mounted punched Plastic film holding the tile tesserae allows easy installation alignment whilst providing adequate ventilation in assisting to the fast curing of the adhesive.

APPLICATIONS:

- Internal and external surfaces – wall and floor
- Dry to fully submerged areas
- Swimming pools, Water features, Shower Cubicles
